Centennial Vision of Save the Redwoods League:

Save the Redwoods League envisions vibrant redwood forests of the scale and grandeur that once graced the California coast and Sierra Nevada, protected forever, restored to grow old again, and connected to people through a network of magnificent parks and protected areas that inspire all of us with the beauty and power of nature.

About Save the Redwoods League

Save the Redwoods League, one of the nation's oldest conservation organizations, is celebrating 100 years of protecting and restoring coast redwood and giant sequoia forests and connecting generations of visitors with their peace and beauty. Its more than 20,000 supporters have enabled the League to protect more than 200,000 acres of irreplaceable forest and help create 66 redwood parks and reserves.

About the League's Education and Parks Support Programs

California's state parks shelter 60 percent of the world's remaining old-growth redwood forests, but they have also experienced declining funding over the past two decades despite an increased demand for services. The League's Parks Support Program transforms visitor experiences through improved access and interpretation and protects the redwoods and other natural resources within the parks. The League's Education Program connects new generations to redwood forests by providing free field trips and education materials, teaching students about the importance of redwoods and what we all can do to protect them.
